

FINALLY—A COMPLETE PICTURE OF PATIENT HEALTH

Support better outcomes with a new integrated care platform for behavioral, medical, and dental health

NextGen® Behavioral Health Suite is the first fully integrated ambulatory platform designed to reinvent how clinical information is shared among providers. The scalable solution empowers healthcare providers to leverage unique productivity tools that enable innovative care options and better outcomes.

Groups can make use of medical, dental, and behavioral/mental health information within their residential, inpatient, and outpatient programs to deliver a better patient experience, improve efficiency, and ultimately focus more time on patient care.

For every 10 people in a doctor's office, seven are there seeking care for reasons related to behavioral health.¹

NextGen Behavioral Health Suite unites traditionally disparate data—typically contained within separate medical, dental, and mental health records—into one record on a single platform.

Clinicians can now see a comprehensive view of a patient's record and share the information seamlessly. And with NextGen® Share, users can easily exchange clinical information with external entities, such as hospitals, referral groups, labs, and pharmacies.

The new suite facilitates the delivery and administration of behavioral health services in a wide range of settings, including:

- **Substance use programs** for alcohol, drugs, and opioids in residential treatment, detox, intensive outpatient services, partial hospitalization, and medically managed inpatient services
- **Mental health services** at inpatient psychiatric hospitals, psychological services, and psychiatric rehab services
- **Family services** for children, youth, adults, and families
- **Individual and group therapy**
- **Crisis intervention and risk assessment** for suicide prevention, sexual assault, abuse, and other life crises
- **Child services** ranging from learning disabilities to moderate and serious mental illness
- **Case management** including assessment, planning, and coordination in delivery of services to meet individual or family health needs
- **Peer support programs** that promote recovery through education, role modeling, and empowerment

Gain robust, comprehensive behavioral health content to support the most **common treatment services**:

- Outpatient and residential mental health and substance abuse services
- Asam assessment including Continuum® Integration and CO-triage
- Opiate treatment program support
- Numerous screening tools and scales
- Methadone clinic support
- Targeted case management
- Peer support services
- Mental and behavioral health crisis services
- Client defined programs
- Robust behavioral health billing capabilities for residential, inpatient, and outpatient services
- Improved group scheduling functionality
- Out-of-the-box behavioral health-specific reports and CCBHC quality measures
- Support for MRO environment

Powering patient outreach

Outreach campaigns are critical to effectively managing care in value-based reimbursement. NextGen® Population Health solutions make patient outreach easier and more efficient by enabling you to quickly identify at-risk patients and notify them of steps they can take to improve their health. For a proactive approach, you can automate patient reminders.

“NextGen Behavioral Health Suite gives us a holistic picture of our patients’ complete health data in one place, so we are better equipped to treat the whole person, not just one symptom or disease. Now that all this data resides in one integrated platform, we can spend more time caring for patients than requesting records or collecting history.”

Isaiah Nathaniel, CIO
Delaware Valley Community Health Inc.

Save time with a smart, digital pen

NextPen®

Capture discrete data directly into the EHR with a smart digital pen. NextPen® saves clinician and patient time by digitizing data on forms like PHQ9s, assessment tools, treatment plans, and family history questionnaires. In addition, no one needs training on how to use a pen.

Tap and go with the convenience of mobile

NextGen® Mobile

Document the way you want and save time with mobile dictation and discrete data capture with EHR integration. Spend more quality time with patients with a flexible EHR at your fingertips. Send referrals out and allow external providers to download the mobile for immediate access to your patient’s clinical records.
