Minimum Disruption. Maximum Flexibility.

Welcome to the New Era of Electronic Medication

The Medication Management Experience You've Always Wanted

Rcopia® is a revolution in e-medication management software. Built on our experience serving over 220,000 healthcare professionals and delivering more than 1 billion medication transactions, Rcopia ushers in a new era of medication history data access, legend drug and controlled substance e-prescribing, and patient medication adherence support.

In addition to technical capabilities, Rcopia raises the bar for user interface design, workflow customization, and mobile access.

Work the Way You Want

Rcopia offers maximum flexibility in designing your desktop experience. You have the freedom to drag and drop on-screen modules to customize the layout of your screens and support your preferred workflow, versus adjusting your workflow to support your software.

On-the-Go E-prescribing

Securely prescribe, transmit, and manage patient prescriptions no matter where you are. iPrescribe® transcends the desktop and puts the power of Rcopia onto your iPhone or Android device so you can quickly process renewal requests, manage pending prescriptions, and write new prescriptions faster and easier than ever before.

DRFIRST 1/1/2020

Welcome to Rcopia4...
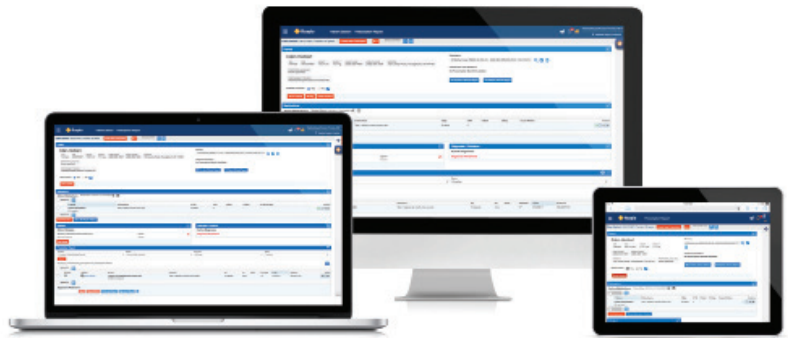

Medication History—The industry's most complete patient medication data feed is designed to present 12 months of patient medication history in a matter of seconds, significantly streamlining provider medication reconciliation processes and enhancing patient safety.

PDMP Compliance—Comply with state mandates to perform a Prescription Drug Monitoring Program (PDMP) check before prescribing a scheduled drug. EPCS Gold℠ provides in-workflow access and seamless connectivity to controlled substance prescribing history.

Universal E-prescribing—The #1 e-prescribing software on the market includes legend drug e-prescribing and decision support, and pairs with DrFirst's EPCS Gold module for electronic prescribing of controlled substances to create a seamless, single workflow for all prescribing needs.

Faster Prescription Selection—Powered with DrFirst's SmartSuite℠ predictive analytics technology, Rcopia "learns" the provider's prescribing patterns in order to facilitate medication decisions with fewer clicks, cleaner sig instructions, and reduced need for back-and-forth pharmacy clarifications.

Experience the new era in e-medication management today.

Clinical Decision Support—Rcopia is designed to make prescribing safer for the patient and more efficient for the provider, including drug-drug, drug-allergy, dosing, and duplicate therapy alerts, patient-specific formulary guidance, and provider-specific drug favorites functionality.

Patient Engagement—Engage patients to start treatment after the point of encounter using a secure (SMS) text message to share coupons, copay information, and clinical education to reduce prescription abandonment.

Medication Administration Support—DrFirst takes the friction out of prescribing from streamlining the prior authorizations with ePA+℠ to verifying patient benefits, formulary and out-of-pocket drug costs in real-time with myBenefitCheck℠. All transactions are compliant with the NCPDP standards for RxChange.

Medication Adherence Monitoring—The PatientAdvisor toolbar within Rcopia alerts providers to patients at risk for non-adherence and empowers providers with tools to encourage compliance, including diagnosis-specific education resources, financial savings opportunities, and behavioral support programs for their patients.
