

Registration Quick Start Guide

To register, you will need:

NPI Number

Social Security
Number

Driver's License or
Passport

Access
to Email

1

Download and Launch

iPrescribe is available on iOS and Android.

After downloading the app, launch it on your mobile device: tap **Get Started**, then tap **Sign Up**

2

Add Your Information

After you enter your NPI, you will be asked to:

- Create an iPrescribe username and password
- Confirm your personal info
- Confirm your practice info

3

Take a Picture of Your ID

You will be asked to take a picture of either your driver's license or passport:

- For **driver's license**, take the photo in landscape so the card fills the screen but no edges are cut off
- For **passport**, take the picture in portrait of the pages with signature and photo

4

Verify Your Identity

Next, iPrescribe opens ID.me to verify your identity. You need to:

- Confirm your email
- Add a two-factor authentication—we recommend using text messages
- Upload the photos of your ID

- Enter your Social Security number
- Enter your NPI number

*You may be asked for additional information in ID.me depending on how your credentials match their identity checks.

5

Log in and begin e-prescribing!
