

OPTIMIZE YOUR BILLING. EXPEDITE YOUR CASH FLOW.

# ACCELERATE™

eVero's comprehensive billing, payment  
and revenue management solution

---

eVero's ACCELERATE™ software module gives you full control of your Medicaid, State-Paid, Self-Paid, and MCO billing right from the eVero Integrated Care Management™ (ICM) platform. Automated workflows collect service details from our platform database and efficiently generate, validate, submit and track electronic claims, so you get paid faster. Customizable dashboard views track payments and current receivables and project future receivables, providing real-time visibility into the entire revenue cycle.

## BENEFITS OF ACCELERATE™ INCLUDE:

### SUBMIT CLAIMS FASTER

Since all required service data is captured by and stored on our platform, claims can be created, approved and submitted the same day that service is delivered. Batch order submissions are also supported.

### REALIZE REVENUE SOONER

Our streamlined claims process eliminates delays associated with obtaining service data from outside EMR systems or reviewing and resubmitting denied claims, so you receive payments faster.

### ENSURE CLAIM ACCURACY

Data validation tools built into our platform, combined with daily Medicaid eligibility checks, verify that each claim is coded properly and error-free before being submitted.

### REDUCE COSTS

Save money by eliminating fees for third-party billing providers and clearinghouses, and the labor costs associated with manual verification checks, denied claim management and report creation.

### MANAGE THE ENTIRE REVENUE CYCLE

Customizable dashboards provide insight into actual and potential cash flow – which includes payments, accounts receivable, and projected revenue from services delivered but not yet billed.

### INCREASE OPERATIONAL EFFICIENCY

Automated alerts ensure that time sensitive items, such as the Medicaid 90-day submission deadline or ePaces recertification, are never overlooked and don't lapse or expire.

### BE AUDIT-READY

All submitted claims are linked to the actual service records stored on our platform, providing easy access to support documentation to simplify the audit process.

## ADDITIONAL BENEFITS:

- Cloud based; automatically updated to meet regulatory and compliance changes
- Easily integrates with third-party Accounting, General Ledger and EMR systems
- Conducts daily Intake Claim and Medicaid Eligibility verification checks
- Standard and customized report options, all exportable
- Unparalleled support, from onboarding to Help Desk (*email, phone, chat*). At no extra cost.
- 100% HIPAA EDI Compliant
